Grupo Arbulu will be present at Navalia Nautical, Marine Instruments, Aage Hempel Group and Silecmar

Like every year at NAVALIA, [NAUTICAL](#) and [MARINE INSTRUMENTS](#) (stand D06) will actively participate. NAUTICAL, will launch their latest navigation and fishing equipment and its connectivity and communication satellite solutions for the fleet and its services especially focused on the client and the vessel, wherever it is.

Nautical, one of the main players in the digitization of the maritime sector, especially the fishing sector, will showcase its latest and more innovative solutions for this sector, one of the most digitally advanced.

And, all this from the proximity to the client, with its experience of more than 50 years providing individual and customized advice on the implementation of new technologies on the market. Its goal: to improve the efficiency of its customers, both in operations on board, in the fishing activity itself and its sustainable management.

Marine instruments

The improvement of fishing efficiency is one of the main aims of Marine Instruments, something in which the company has been working since its inception. With an extensive R&D team that currently accounts for more than 40% of its workforce, this company located in Nigrán (Pontevedra) designs, develops and manufactures high technology for the fishing sector.

One of its latest innovations is the buoy M3iGo, the first satellite buoy with artificial intelligence on the market. The satellite buoy, designed to transform tuna fishing activities in a much more efficient and sustainable operation allows the employer to have useful information about the target fishery, and so the skipper can make decisions that save fuel and improve their fisheries, making them much more sustainable.

Silecmar

In optimizing the vessel's efficiency and its fishing activity, also works the Grupo Arbulu company, Silecmar.

The company will showcase at Navalia the first 360° solution for the naval sector, composed of Silecloud the comprehensive fleet management tool, Silecred, maneuvering fishing control tool Silecred, the onboard process management Silecgest and the naval digitization solution, Silecnav. Thanks to the integration of instrumentation and sensors from Krohne with custom engineering from each shipowner, fleet and vessel, Silecmar achieves a total digitization on board, allowing the control of multiple processes and managing optimization.

Aage Hempel Group

Aage Hempel Group (stand C17), is a Grupo Arbulu company focused in providing service to shipping vessels, tugboats, work vessels and ocean exploration vessels, quickly and efficiently. Whether it is inspections of classification societies, repairs on board or facilities, Aage Hempel Group adapts to the needs of each client and vessel, always with the aim of reducing the time of inactivity at port or anchor.

To do this, they have a team of highly specialized and certified technicians which executes the jobs in a 91.5% of cases in a first visit on board, guaranteeing a high-quality service. In addition, they have an international service network in the main Spanish and world ports and offices in 11 countries of the world.

IV Fine Awards

Within the framework of Navalia will be held the IV Fine Awards, awards of great recognition in the industry that will award the best Shipowner,

Shipyard, Vessel, Institution, Professional, Maritime Engineering Project, Fishing and Port Sector, and of Honor to the Professional Career.

Grupo Arbulu, along with other companies leaders of the sector, will sponsor one more year these awards. The event will be held in the Pazo de los Escudos where the entire Spanish naval sector will be attending. It will be a great occasion to meet clients, friends and collaborators and share experiences in person, after two years of pandemic.

Nine international companies

Grupo Arbulu is currently made up of a total of nine international companies, all of them specialized in technology solutions for the naval sector, digitization, naval electronics, on-board connectivity solutions, satellite communication, technical service and support anywhere in the world.

In addition to Nautical, Marine Instruments, Aage Hempel Group and Silecmar, are also part of Grupo Arbulu, Thalos (France), Navteam (Denmark), SMD (South Africa), Radio Electronic (Namibia) and E3S (Spain). Their webpage, www.grupoarbulu.com, in addition to information on the group and its companies, includes relevant information for the naval sector on technology, digitization, connectivity and communications.

If you are attending Navalia, do not hesitate to visit the stands of the companies of Grupo Arbulu, experts in technological solutions connectivity, service and support for the naval sector.
